Summary

Whilst studying for GCSEs I am working on my own web development business (including marketing and advertising) as well as paid and voluntary work for different organisations, helping them to create logos and editing video. I am fluent in Python and web programming languages such as Javascript and NextJS to build websites for clients from scratch; some of which can be found at the above web address.

Work Experience

Fujj - online confectionary business

I started Fujj in May 2020 and developed a recipe good enough to sell. I have designed the packaging, logos and branding and built the ecommerce website from scratch using modern programming languages. I regularly attended events selling directly to the public. I also gained a 5 star hygiene rating and this taught me how to safely manage food products.

Responsibilities:

- Designing branding, impactful packaging and logo
- Make and package the product
- Run the company P&L
- Directly sell online and through social media channels
- Scheduling Facebook and Instagram posts
- Comply to local food safety regulations (5 star hygiene rating)

Freelance Web Designer and Developer

Working with different local businesses, I have designed and built company websites. This has entailed taking a brief, negotiating costs, communicating with the client on a regular basis and then delivering a complete product for them to use as their corporate website.

Example companies I have worked with:

- Dijjie Consulting, Bedford
- House of Handsome, Kempston
- Song Squad, Bedford
- Veil and Vogue, Bedford

More examples and testimonials from my clients can be found on my portfolio (thomasprice.me)

Staysure Group - Insurance business

I was asked to edit a number of corporate videos for an employee attraction campaign. I was provided with raw footage and I used video editing software to enhance, edit and overlay music.

Wixams Community Watch - community organisation (voluntary)

I designed their current logo, ensuring I considered the requirements of needing to be authoritative, simple, eye-catching and reflective of the local area.

Education

GCSE Level 2 Distinction* in Creative iMedia.

I have sat my GCSEs and I am waiting for my results.

- Computer Science
- Business Studies
- Science Trilogy (Single science)
- English Language
